Global Client Manager

The project GlobalClientManager shows how to manage global client data with the system variable CURRENTCLIENTID.
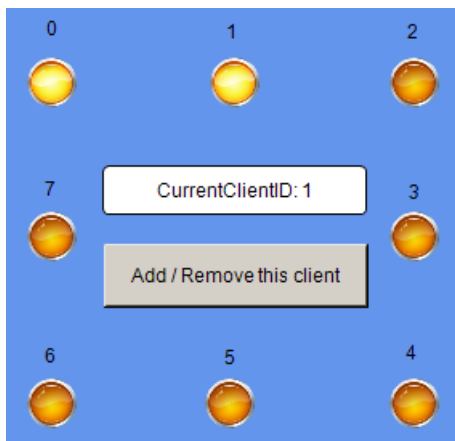

Product description

The project GlobalClientManager shows how to manage global client data with the system variable CURRENTCLIENTID.

More information

The client-id of the current client can be added or removed to the global array g_aClientIds by the function "Add / Remove this client". The value is assigned on the OnMouseDown event of the button. The content of the array is shown by eight lamps.
