System requirements and restrictions

Engineering	CODESYS Development System V3.5.20.10 or higher
Runtime	CODESYS TargetVisu for Linux SL V4.12.0.0 or higher
Supported platforms	Debian Linux (debian package mechanism), CPU: x86_64, ARM, ARM64
Additional requirements	QT6 with graphical user interface installed SSH server Linuxuser with GUI session installed glibc >= 2.36 (Debian 12)
Restrictions	None
Licensing	

Single device license: The license can be used on the target device/PLC on which the CODESYS runtime system is installed.

Licenses are activated on a software-based license container (soft container), which is permanently connected to the controller. Alternatively, the license can be stored on a CODESYS Key (USB dongle). By replugging the CODESYS Key, the license can be used on any other controller.

Hinweis: Licensing is done via application based licenses on the controller/PLC side.

Note: Technical specifications are subject to change. Errors and omissions excepted. The content of the current online version of this document applies.
